EDUCATION

ACADEMY OF TECHNOLOGY

B.Tech in Computer Science and Business Systems | CGPA : 7.39

2022-2026

SERAMPORE UNION INSTITUTION

High Secondary | XII | WBCHSE | Percentage : 79%

2020 - 2022

MAHESH SHRI RAMAKRISHNA ASHRAM

Secondary | X | WBBSE | Percentage : 85%

2010 - 2020

SKILLS

- Languages** : Python , SQL
- Frameworks** : FastAPI ,React.js (Basics)
- Libraries** : Numpy , Pandas , Matplotlib , Scikit-learn
- Tools** : Git, GitHub, Jupyter Notebook, VS Code, Streamlit
- Databases** : MySQL
- Concepts** : Object-Oriented Programming (OOP - Python based), Data Structures and Algorithms (DSA), Database Management Systems (DBMS) , REST API
- Soft Skills** :
 - Problem Solving
 - Adaptability
 - Quick learner
 - Time Management
 - Team Management

EXPERIENCE

Data Science Intern — Pinnacle Lab (Virtual) | [Certificate](#)

Tech Stack: Python, Machine Learning, Natural Language Processing (NLP) NLTK, FastAPI, HTML, CSS

June - 2025.

- Completed 4-week virtual internship focused on NLP and machine learning model development.
- Built SMS Spam Classifier using TF-IDF and Naive Bayes, achieving 97% accuracy; deployed with FastAPI.
- Developed Sentiment Analysis project applying NLP techniques on real-world text datasets.

PROJECTS

○ IPL Analysis Dashboard | [GitHub](#)

October 2024

Url: <https://iplanalysisproject.streamlit.app>

Tech Stack: Python, Pandas, Matplotlib, Seaborn, Streamlit

- Built an interactive IPL analysis dashboard processing 500,000+ ball-by-ball delivery records.
- Cleaned and processed match and delivery datasets; visualized winning trends and player performance stats.
- Analysed toss impact and venue-wise match outcomes across 16+ seasons.
- Implemented 6+ dynamic filters for teams, seasons, and players; created a user-friendly Streamlit interface.

○ SMS Spam Classifier | [GitHub](#)

May 2025

Url: <https://sms-spam-detect.vercel.app>

Tech Stack: Python, FastAPI, HTML, CSS, Scikit-learn, NLTK

- Built an SMS Spam Classifier using TF-IDF vectorization and Naive Bayes algorithm.
- Achieved 97% classification accuracy; evaluated using precision, recall, and F1-score metrics.
- Deployed end-to-end web application using FastAPI for real-time user input predictions.

○ College Attendance Management System | [GitHub](#)

June 2025

Url: <https://attendx-dev.vercel.app>

Tech Stack: Python, Flask, HTML, CSS, Scikit-learn, NLTK

- Designed and developed a full-stack Attendance Management System for a college environment.
- Implemented secure JWT-based login and role-based access control for Admin, Teacher, and Student roles.
- Built separate dashboards for each user role; connected FastAPI backend to MySQL database via ORM.

○ Potato Disease Classification | [GitHub](#) | (Final Year Project)

Tech Stack: CNN, Python, FastAPI, React Native, TensorFlow

- Developed a CNN-based model to detect potato leaf diseases with 98% classification accuracy.
- Built REST APIs using FastAPI for real-time disease prediction and data management.
- Integrated MongoDB to store user details and prediction history.
- Developing a React Native mobile app for farmers to identify diseases and receive instant recommendations.

CERTIFICATIONS

Introduction of Data Science (IBM) | [Certificate](#)

March - 2023

- Gained understanding of data science fundamentals, career paths, and industry relevance.
- Learned insights and advice from experienced data scientists for beginners entering the field.

Python for Data Science, AI & Development (IBM) | [Certificate](#)

April - 2024

- Proficient in Python, including data structures, functions, and OOP.
- Skilled in Pandas, NumPy, Scikit learn for data analysis and machine learning
